

Key Dates

School Opens

Monday 23rd February

World Book Day

Thursday 5th March

Fluoride Varnish Application

Monday 16th March

Eid Celebrations

W/C Monday 23rd March

Close for Half Term

Friday 27th March

Look out for our recipe of the month

A healthy option that we will be making in school and that you can try at home.

Remember Attendance Counts

Regular attendance helps your child to build good habits, form friendships with other children and ensures continuity of learning. Please contact school if your child is absent.

Download the **50 things to do before your five** app.

Look out for the 50 things activities on our weekly What's Happening

Extending Children's Knowledge Following children's interests

Under The Sea

The children have shown lots of interest in sea animals in the water tray. We will add a wider variety of sea creatures, sponges, jugs and containers. We will learn the names of some lesser known sea animals and where they live. We will learn more fascinating facts about them through activities, looking at new stories, non-fiction books and learning new songs with actions for the different sea animals. Using technology we will watch videos of sea animals in their natural habitats.

Growing Plants from Seeds

The children have been taking part in growing plants using our indoor hydroponic growing system. We have already had some success growing herbs and using the plants in our snacks and baking. We will develop this interest by planting more seeds in the hydroponic system but also planting in plant pots on the window sills. Once the weather improves we will look to do some planting outside. We will look at stones and seeds from fruits and vegetables such as Avocado and try to grow them. This way we will talk about what plants need to grow. We will think about fruit and vegetables that grow indigenous in the UK and will discuss climates in far away countries and how they differ from ours.

Introducing New Knowledge and Skills

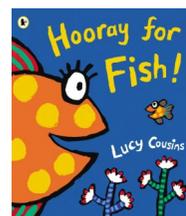

Core Story in GREEN room

This exciting adventure story will support literacy skills such as reading comprehension and sequencing. We will use a variety of props and teach the children a range of imaginative vocabulary used to describe the story setting and characters such as lair and lake, grumpy and hungry.

Core Story in ORANGE and PURPLE room

This book teaches simple concepts of colours, shapes and patterns through the characters of different types of fish. The text has rhythm which helps to learn the story and notice features like spots and stripes. We will use visual aids and symbols taken from the bright illustrations of the book to support the children's understanding.

Celebrations and Festivals

We will teach the children about Ramadan, Eid and Easter. We will use books and stories to teach the children about the different celebrations and traditions, and how festivals are celebrated across the world.

Things you can do to support your child's learning

Your child will benefit from any amount of time you spend together doing simple things; singing songs, sharing books, baking, going for walks, anything that involves you chatting and playing together.

Talk about what you can see

When you are out and about keep count of all the different things you can see such as types of transport, animals and buildings. Do you recognise the different badges and emblems on cars? Can you name different breeds of dogs. Do you recognise any signs on the buildings? You can take photos and keep count through simple tally charts, lists and drawings.

Keeping Healthy— Oral Health

We will be talking to your child about different ways they can keep their teeth and gums healthy. All children will receive their own tooth brush and toothpaste.

You can help your child by making sure that they brush their teeth twice a day using a fluoride toothpaste.

We have the Fluoride varnish team in school this term who can offer a range of advice on oral health for the whole family.

You can book a 1 to 1 appointment via the school office.
